

STEM Forum Attendees: GSTA Invites You to an *Evening of Innovation*

How can we prepare students to be innovators who are ready to tackle 21st Century challenges?

The acclaimed film, *Most Likely to Succeed*, chronicles a community that has redesigned their school to do just that.

The film inspires audiences with a sense of purpose and possibility, and is bringing educators and communities together in re-imagining what students and teachers are capable of doing. After this film, you'll never look at school the same way again.

6-9 pm
Monday, October 26th
